Ghaziabad, UP | +91 9755289555 | atharv.tomar2002@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Computer Science graduate with strong object-oriented programming fundamentals and hands-on backend and full-stack development experience, including a proven track record of diagnosing and resolving system issues across data, integration, and application layers. Comfortable identifying root causes, documenting fixes, and collaborating across teams to keep applications and business systems running reliably. Applies the same OOP and problem-solving discipline across multiple languages and frameworks, adapting quickly to new stacks and technical environments.

Education

Sanjeev Agrawal Global Educational University
Bachelor of Technology in Computer Science Engineering, 7.68 CGPA

Bhopal, MP
Sep 2023 – May 2026

Professional Experience

Software Development Intern

Voyager.ai

Mar 2026 – Present

Gurugram, India

- Acted as first point of contact for data integration and workflow issues, identifying root causes and resolving them to improve system reliability – core application support troubleshooting work.
- Optimized data handling workflows using **Dart**, improving overall system performance by ~12%, applying OOP and structured problem-solving to production code.
- Enhanced dataset efficiency by ~10% through data transformation and standardization, and managed end-to-end data transformation workflows across multiple application layers.
- Designed and standardized structured datasets to improve readability, maintainability, and long-term supportability of the codebase.
- Developed and optimized responsive UI using **Flutter**, ensuring consistent performance and behavior across mobile and desktop devices.
- Collaborated with cross-functional teams to scope requirements, debug issues, and enhance application workflows and features – participating in problem-solving discussions similar to a support engineering environment.
- Used **Git** for version control under structured development and code-review practices, and contributed to documentation for maintainability.

Skills

Core Concepts: Object-Oriented Programming (OOP), Design Patterns, Problem Solving, Software Development Lifecycle (SDLC), Agile Methodologies

Programming Languages: C, Python, JavaScript (ES6+), Dart

Web Technologies: HTML5, CSS3, React, Redux, Tailwind CSS, Responsive Design

Databases & Query Languages: SQL, MongoDB, Firebase (Firestore)

Version Control Systems & Platforms: Git, GitHub, Vercel, Postman

Professional Skills: Communication, Problem Solving, Analytical Thinking, Team Collaboration, Adaptability, Ownership, Client Handling

Projects

Chatty – Real-Time Web Application | *React.js, Node.js, WebSockets*

GitHub

- Built a real-time chat application using **React.js**, **Node.js**, and **WebSockets**, focusing on efficient data handling and seamless communication.
- Managed user data for messaging, groups, and notifications while ensuring accuracy and consistency.
- Implemented authentication and session management (**JWT**) and designed a responsive interface with **Tailwind CSS** to improve usability and accessibility.

AI Fitness Assistant | *Next.js, React, Convex, Vapi AI*

GitHub

- Developed an AI-powered fitness assistant using **Next.js 15** (React 19), **Convex**, and **Vapi AI**, enabling real-time voice-based interaction for personalized workout and diet plans.
- Designed a modern, responsive UI with **Tailwind CSS** and **Radix UI**, focusing on performance, accessibility, and smooth user experience.
